Research Profile

Research-driven scholar with a strong foundation in accounting, financial systems analysis, fraud investigation, educational publishing and banking operations. My research interests focus on the application of Artificial Intelligence (AI), Machine Learning, Data Analytics, and Risk Modelling to financial fraud detection and prevention in emerging markets, with particular emphasis on systemic vulnerabilities in African banking systems, regulatory inefficiencies, and data-informed risk mitigation strategies. I am particularly interested in developing interpretable and scalable data-driven solutions for financial crime detection, regulatory compliance, and risk management within banking and financial institutions.
