

AWODOLA OLUWASEYI ELIZABETH

Ibadan, Nigeria

07065992503 | olueliawodola@yahoo.com

Research Profile

Research-driven scholar with a strong foundation in accounting, forensic investigation, and financial systems analysis, transitioning into data science applications for fraud detection. My work focuses on AI-driven financial fraud analytics in emerging markets, with particular emphasis on systemic vulnerabilities in African banking systems, regulatory inefficiencies, and data-informed risk mitigation strategies. I am interested in developing scalable, interpretable, and policy-relevant machine learning solutions for financial crime prevention.

Education

- Ladoke Akintola University of Technology, Ogbomoso, Oyo State** 2015
B.Tech in Accounting
Second Class Upper

Advanced Research Training

- Graduate-Level Training in Forensic Accounting and Financial Crime Analysis**
University of Benin (Coursework Completed – Research-Focused)
- Specialized training in fraud detection, financial crime systems, and regulatory frameworks
- Conducted research on:
 - Bank Verification Number (BVN) and fraud prevention in Nigeria
 - Financial crime enforcement and institutional effectiveness
- Developed analytical approaches to financial data interpretation and fraud risk identification

Research Interests

- Financial Fraud Detection using Machine Learning
- AI in Financial Services and Risk Analytics
- Data-Driven Regulatory Compliance
- Financial Crime in Emerging Markets
- Financial crime prevention in emerging markets

Publications

- Awodola, O. E., Enofe, A., Embele, K., & Ndu, A. R. (2019)**
Fraud and Performance of Deposit Money Banks
Accounting & Finance Journal, 8(2), 202–213
- Awodola, O. E., Enofe, A., Embele, K., & Ndu, A. R. (2019)**
Fraud and Performance of Deposit Money Banks
Rhema University Journal of Management and Social Sciences, 7(1), 249–264

Research & Project Experience

- Fraud Detection Using Machine Learning (Conceptual Project)**
 - Designed a framework for applying classification algorithms to detect fraudulent banking transactions
 - Explored anomaly detection techniques in financial datasets
 - Tools: Python (beginner), Excel
- BVN and Fraud Risk Analysis**
 - Evaluated the effectiveness of identity verification systems in reducing fraud

- Conducted comparative analysis of fraud trends pre- and post-BVN implementation
- Generated insights for data-driven financial regulation
- **AI Framework for Financial Crime Detection**
 - Proposed a scalable architecture for fraud detection in emerging markets
 - Integrated risk scoring, predictive analytics, and regulatory data systems
 - Focused on real-world applicability in African financial systems

Publishing & Creative Works

- **Founder/Contributor – Awobod Global Publications**
 - Doctor Piri (Children's Educational Fiction)
 - Femi's Rainbow World: Colours of Culture
 - Other educational and literacy-focused publications

Focus: promoting literacy, cultural awareness, and educational storytelling in African contexts

Professional Experience

- **Awobod Global Publications, Ibadan** -
Business Analyst
 - Conducted financial and market data analysis to support business decisions
 - Developed Excel-based dashboards for tracking performance metrics
 - Applied data-driven forecasting and scenario analysis for strategic planning
- **Union Bank of Nigeria** -
Loan Sales & Risk Evaluation Officer
 - Assessed credit risk using customer financial data and transaction patterns
 - Identified fraud indicators and inconsistencies in loan applications
 - Improved loan recovery through structured follow-up analytics
- **Union Bank of Nigeria** -
Customer Care & Digital Banking Support
 - Managed high-volume customer data and service requests
 - Supported KYC/AML compliance and digital onboarding systems
 - Generated reports used for operational improvements
- **Various Organizations** -
Financial Accountant
 - Prepared financial reports, budgets, and cash flow analysis
 - Managed accounting systems and audit processes
 - Supported data structuring for financial decision-making

Technical Skills

- Data Analysis: Excel (Advanced), SQL (Intermediate)
- Programming: Python (Beginner – Pandas, Scikit-learn)
- Visualization: Power BI (Learning), Tableau (Learning)
- Other: Financial Modeling, Risk Analysis, Data Interpretation

Languages

- English – Fluent
- Yoruba – Native

Referees

- Available on request
